

Precise and ergonomic data input

Binding Adjustment machine **DIATRONIC Pro**

The security of driving in snow continuously plays a major role for winter sports advocates. Precise adjustment of ski security systems are necessary for consumer protection. Legislation dictates different standards for different countries. The DIATRONIC Pro meets all official demands, and features easy handling to its users due to its adjustable design concept. For users, DIATRONIC Pro provides an increased working speed, minimal space requirements, as well as a full integration into all existent rental service processes. Independent of the adjustment method (via weight or Tibia method) it delivers precise and secure adjustments for all customers, so that they may have trust in you and your service.
