Belt Waxing Machine for Tuning Experts BWM 350 Pro

High-quality waxing brings the tuning to a successful close. The warm up period for the BWM 350 Pro waxer is very quick. The stable hot air supply offers automatic temperature regulation resulting in a constant waxing result along with low wax and energy consumption and therefore achieves odorless working.

Efficient and cost-saving waxing

The waxing belt inserts the applied wax directly into the base. Subsequently the integrated waxing brush guarantees optimized base finish. It polishes the wax into the base and exposes base structure and edges except for a small coat.

Cleaning and maintenance

The easily removable cover and the handy stainless steel wax collection tray enables fast cleaning of material residues. Simple maintenance, as well as a fast change of the waxing belt, makes the BWM 350 Pro fun and user friendly.

A good investment for the future

The integrated storage space within the machine stand keeps consumables within reach and therefore provides organization in the workplace. Manufactured within familiar, compact Reichmann-quality BWM 350 Pro holds long durability and high value retention. If desired, the BWM 350 Pro can be purchased with casters.

TECHNICAL DATA BWM 350 PRO

Dimensions (L x W x H) in mm	515 x 640 x 885
Weight in kg	74
Connecting voltage	400 V, 3 PH/N/PE, 50 Hz
Connecting plug	CEE 16A 5-pol.
Engine speed 1/min	560
Connecting power in kW	3,25
Operating temperature in °C	90
Waxing belt in mm	Ø 472 x 350
Structure brush	Ø 129 x 350
Heating in W	2500
