

Optionally  
double support roll  
for snowboards

Layout KSM-F

## Precise Side Edge Tuning KSM and KSM-F

**Entry into professional edge tuning**  
Small and movable - KSM and KSM-F offer superior edge quality.

The KSM edger sharpens and bevels both the side and base edges from of 86° to 90°. The attached support roll can be adjusted to the desired edge degree. The base edge adapter is the perfect solution for snowboards and wide skis.

The KSM-F is an exact edge finishing machine, allowing you to achieve polished side and base edges free of burrs. Polishing is the last step of the service process providing an important mirror finish with outstanding edge sharpness for all snow conditions.

## A good investment for the future

Both machines are fast and easy to handle requiring very little maintenance and, with low investment costs and high cost effectiveness thanks to a short pay-off period. Both machines are available as table units requiring minimal space, or sold with a solid machine stand. Also, you can obtain KSM and KSM-F with casters to make the machines even more mobile.

### TECHNICAL DATA KSM/KSM-F

	KSM	KSM-F
<b>Dimensions</b> (L x W x H) in mm	820 x 450 x 450	710 x 400 x 500
<b>Weight</b> in kg	50	50
<b>Connecting voltage</b>	400 V, 3 PH/N/PE, 50 Hz	
<b>Connecting plug</b>	CEE 16A 5-pol.	CEE 16A 5-pol.
<b>Engine speed</b> 1/min	1375	1415/690
<b>Connecting power</b> in kW	0,43	0,46
<b>Coolant tank</b> approx. in l	22	22
<b>Side edge sanding belt</b> in mm	20 x 1200	
<b>Tuning discs</b> in mm		Ø 250 x 20
<b>Pump</b> in W	60	60
