

RENT - DRYING

**Boot dryer iDry**

- > Hot air drying with low energy consumption and variable heating output, ensures low operating costs
- > Easy to use, multi-language, touch-panel display controls all disinfection and drying functions
- > Large volume disinfectant tank is sufficient for 15 cycles, thereby reducing refilling operations and working time
- > Each boot shelf has its own water drain for avoiding drop-downs on the material below
- > Valve in air duct only opens when shelf is occupied, to reduce material consumption and cost
- > 90° angle, ball bearing, rail system avoids blockage of dirt, and ensures easy movement with little strain
- > Hot air power ranges from 550–3325 watts/400 volts

L x W x H in mm	Capacity
1700 x 670 x 2253	45 pairs of shoes
2200 x 670 x 2253	63 pairs of shoes
2750 x 670 x 2253	81 pairs of shoes

**Boot wall dryer**

- > Wall-mounted for minimum space requirements
- > Hot air fans up to 500 - 2000 watts ensure fast but gentle drying
- > Simple control of touch-panel display helps to save time
- > High degree of flexibility: all wall-hung dryers are also available as mobile roller units
- > Hot air power ranges from 500–2000 watts/230 volts

L x W x H in mm	Capacity
500 x 600 x 750	4 pairs of shoes
500 x 600 x 1830	10 pairs of shoes
500 x 1200 x 1830	20 pairs of shoes

**Speedy disinfection**
