

Maximum safety due to mechanical or electronic closing devices

STORAGE

The storage guideline of Reichmann sets new standards in design and functionality. We realize what customers want and need. The ambitious skier finds great importance in high-class locking systems. The trends are in the direction of the design oriented cabinet systems, which can dry shoes and clothes, as well as accommodate winter equipment.

Furnishing of all styles complies with latest fashion and concepts

Rental shop and storage equipment

Please choose your preferred product line:

- > Standard shop in harmonious, light natural wood
- > Retro-rustic design (retro country style) utilizes old wood, stone, brickwork, and plaster
- > Futuristic design, individually planned using modern surface materials such as metal, glass and rugged colored plastic
- > Experience design, individually planned using anything that's "fun" and makes for a great experience

Storage systems

- > Mechanical (key) and electronically (transponder) closing device guarantee highest security
- > Ski passes from SKIDATA or team AXESS, and hotel key cards enable electronic storage entry
- > Transponder, ski pass, and key card scanner is to be placed near the locker or in the premises
- > Rentmaxx deposit software supports management for optimized deposit processes
- > Safe storage of shoes, clothes, and equipment for every customer

Standard shop

- > Multifunctional terminal for swift handling of all formalities and administrative matters
- > Adjustment unit for rapid adjustment of all kinds of bindings
- > Boot fitting unit for convenient fitting of ski and snowboard boots
- > Presentation furniture for optimum merchandising of products available for rent

Storage design

- > Individual color designs are possible: RAL colors and/or special options
- > Realization of an individual rental shop concept in terms of the service provider's own corporate design
- > Provide advice with planning process including color and room concepts
