

Additional storage space in numerous drawers within top, as well as one large drawer underneath the bench

### Perfectly organized within your Daily Service Routine Multi function workbench

With the Reichmann multifunction workbench you will achieve a well-organized working space supporting your daily business. In the lower part of the workbench you will find an integrated drawer for repair material, accessories and tools. On the table top there is an ergonomic, optimized space for the ski clamps for binding adjustment that is rapidly adjusted to every ski or snowboard.

With the optional overhead feature, there is enough room for more storage space. There you can store electric screwdrivers, power drills, or the tool balancer – as weight compensating suspension. The work bench is designed for two activity areas and can be updated with POLYMAT 1 or 2 that are available with the workbench as options.

#### Components:

- Universal vise for binding adjustment for 2 skis or 2 boards (does not work with Polymat)
- Two adjustable supports for skis and snowboards
- Drawers and shelving for plenty of storage
- Overhead and 110v AC outlet(s)
- 24 compartments for screws, hole plus, etc.
- Tool brackets to hold and organize tools
